

FRIENDSHIP PARK PROGRESS

More progress has been made on Friendship Park! Carey Witt, of GeoSolutions, designed the park with the guidance and feedback of the Parks and Environment Committee. Carey has been hands-on with implementing his design and has worked closely with Robert Nelson to complete the embankment on Reed Drive and create a drive-through of the park. Robert has worked hard on leveling the concrete pads for the picnic tables and Ryan Murphy and his scout troop are designing a covered pavilion near the play area by the benches. Stay tuned as Round Three begins!
